Ayush Srivastava

+91 9084523445 | Noida, Uttar Pradesh | constayush@gmail.com | linkedin.com/in/constayush | github.com/srivastava-ayush | srivastava-ayush.vercel.app

SUMMARY

Full-Stack Developer with hands-on experience building production AI-integrated systems, including Retrieval-Augmented Generation (RAG) pipelines, vector database search, and LLM service orchestration. Proficient in JavaScript/TypeScript, React/Next.js, Node.js, and REST API design, with practical exposure to cloud deployment, CI/CD, and scalable backend architecture. Comfortable owning end-to-end features — from database design to debugging production issues.

EXPERIENCE

Fullstack Intern Month 2025 – Present

CarbonSynq

- Built and shipped Retrieval-Augmented Generation (RAG) applications, integrating [Vector DB Name] for semantic search and embeddings-based retrieval
- Developed full-stack features end-to-end across frontend and backend, designing REST APIs, data models, and asynchronous data flows
- Deployed and monitored services on [AWS/GCP/Azure], and configured CI/CD pipelines (GitHub Actions) for automated build and deployment
- Debugged and optimized backend performance and reliability across services and environments

Technical Executive 2024 – Present

Google Developer Group (GDG)

- Organized and conducted 5+ technical workshops and developer events with 100+ total participants
- Mentored 20+ students in full-stack development and modern JavaScript frameworks

PROJECTS

BoxLit — AI Boxing Training Platform | *Next.js, TypeScript, Node.js, Express.js, MongoDB, TensorFlow.js* boxlit.vercel.app

- Built a full-stack, real-time system processing continuous data streams at 30 FPS with sub-200 ms latency
- Implemented browser-based machine learning inference (TensorFlow.js) optimized to under 50 ms per frame
- Designed asynchronous feedback and session-tracking logic across frontend and backend layers

Kodak — Offline Voice Assistant | *Python, Vosk, pyttsx3, pyautogui* github.com/srivastava-ayush/kodak

- Built an offline voice assistant supporting 20+ system-level commands with real-time speech recognition
- Optimized for low-latency, zero-cloud-dependency execution with CPU usage maintained at 10–15%

Slices UI — React Component Library | *React.js, Next.js, TypeScript, Tailwind CSS* slices-ui.vercel.app

- Developed 15+ reusable UI components and custom hooks, standardizing patterns across multiple projects

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST API Design, Asynchronous Systems

AI/ML: Retrieval-Augmented Generation (RAG), Vector Databases, Embeddings, LLM Integration, TensorFlow.js

Databases: MongoDB, PostgreSQL, SQL & NoSQL, Mongoose

Cloud & DevOps: [AWS/GCP/Azure], CI/CD (GitHub Actions), Docker

Tools: Git, GitHub, Postman, Vercel

Core Concepts: Data Structures, Algorithms, System Design, OOP

ACHIEVEMENTS

- Best Negotiator Award — IEEE JIIT Startup Showdown
- All-India Rank 6 — Kirwa Hackathon

EDUCATION

Galgotia College of Engineering and Technology 2024 – 2028

B.Tech in Computer Science and Engineering *GPA: 8.0/10*

Invertis University 2021 – 2024

Diploma in Computer Science Engineering *GPA: 8.1/10*
